how to use LEX

how long is the course

learning vocabulary is a life long process.

i'm still learning new words

i expect to never learn all the words

i expect to always be learning new words.

there is a core lexicon consisting of
approximately 3000 words which
accounts for more than 97%
of written words

average daily rate for average saps
is less than 1000 words.

* do a research project tape people

Back

12.53E

Lex is a simple concept.

Using a computer, the text of 22 English/American contemporary Books* was combined and a concordance generated, resulting in a list of all the words used along with the number of occurrences of each

Combined prepositions

book
CDROM of Macintosh

The list itself, even without a computer, is can be a powerful aid in mastering English LEXICON
So I've decided to make the paper version available while the electronic version is being finalized

Some rather startling info 12,539
becomes immediately clear.

First of all, a surprisingly small
number of words comprise
a startlingly large ~~number~~
percentage of word usages

Articles, The, A, An comprise
fully 10% of all words used
clearly, mastering A/the/an is
crucial.

the first 100 (words/group) comprise
50% of a word-use

There is no magic way to learn
Eng LEX

if you completely dedicate your
life to this task you could
take 1 yr to 5 years

denying the validity of identity
the concept of identity
defined as meaning exact
sameness in all aspect.
is obviously ridiculous
identity must include
occupying some space at
same time.

then talk of Two identical⁷

strings of DNA does require multiple
universes to negate identity

Now in not denying an existence
of multiple universes. I have no
reason to deny that, only that it's not
necessary to debunk identity

everything is unique ^{no-thing} 12,563
nothing ("thing") can be identical
with any other "thing"

a fundamental philosophical question is...
what/ who am I?

or
- to what does the word "I" refer

ans. anything i wants it to refer to

using epistemology as the base is humbling.

it places limits on what we know - what we can know

it define "know" to a more proscribed arena
restricted sphere domain

- in the past, frontiersmen explored a physical wilderness territory
- the physical frontier has moved to space and been reduced to small niches on Earth
- however, we are in the midst of a vast epistemological wilderness
- most spaces are either unaware of it, (or if they are) terrified by it.

they are outwardly visible

the purpose of gendo for es!

- to wake up the students ears
- most people don't really hear language accurately
- they hear thru filters trained into them during the first 6-8 years of life.
- most people master the sound inventory of their native language by then.
- henceforth, they listen for semantics not phonology
- they learn to listen for the differences that make a difference
- a different language requires a new set of filters

Theory:

Don
to Buchla

I've been a long-time fan of your work.
You've been an inspiration for me to follow
my own path.

Among many projects i'm juggling, i have
chosen to redo (where necessary)
all human symbol systems. including
~~our~~ ~~our~~ number, writing, clock, calendar
So far i've done x_1 x_2 x_3 x_4 x_5 x_6
Obviously i'm writing to you about x_5 + x_6

? Question - is everything REALLY
made of "elements" - atoms etc.

? OR is that just our current way of
thinking about our experiences
OR are they created in the lab

? Are there "things"

? Do "things" "exist"

maj. 234 123 1
min. 231 234 1

12,747

In the process of re-designing all human symbol-systems*, i've had occasion to create a new keyboard design/layout that greatly simplifies learn to play a keyboard instrument

the keyboard physically covers 6 octaves, (73 notes), have 109 keys arranged in 3 tiers and is only 31.5" wide (key-to-key)

* so far completed calendar, writing, clock numbers

I don't have many delusions as to the likelihood of any of these systems to be adopted any time soon (or at all, for that matter)

however, the new keyboard layout and notation (tablature) are so superior to the old way that I think the time / technology may have reached a point of possibility

who is hevan	and why does he think
what is gendo	he can help you improve
theory	your listening/speaking
	skills, when nothing
	else has worked?

- Gendo consists of exercises/activities designed to dramatically improve your listening/speaking skills
- Of course, there is no magic formula.
- You still will have to put in some time and effort.
- it will take months, but it will work
- before you can speak like an American you must hear like an American
